CAREER OBJECTIVE

Front-end developer with a strong foundation in HTML, CSS, JavaScript, and frameworks like Vue.js. Driven by a passion for building visually appealing, responsive, and user-friendly web applications. Seeking to contribute my technical expertise and design skills to create impactful digital experiences, while continually learning and adapting to new tools and technologies in front-end development.

WORK EXPERIENCE

Front-End Developer

Blood Bank Management System

a comprehensive web application enables users to register donors, track blood inventory, and manage requests with a responsive and intuitive interface

Inventory Management System

a web-based application developed using HTML, CSS, and PHP that allows users to efficiently manage and track product stock, sales, and purchases .

FAQ Accordion:

allows users to toggle and view answers to frequently asked questions in a collapsible format. It enhances user experience by keeping the interface clean and organized while providing quick access to relevant information.

Social Links Profile :

designed to display and link to various social media profiles. It features customizable icons and a user-friendly layout for easy navigation to personal or professional social media accounts

Pig Game

- interactive dice game developed with HTML, CSS, and JavaScript, where players take turns to roll a die and accumulate points. The game allows users to choose when to hold their score or risk losing it, with an intuitive interface and real-time score tracking
